SUMMARY

Full-stack software engineer with 3+ years designing and shipping production web applications across e-commerce, SaaS, and AI-driven products. I architect resilient backends and clean APIs (Laravel, Node.js, GraphQL, REST), model data layers that scale, and build fast, polished front-ends in React and TypeScript. Equally at home owning a feature from database schema to pixel, wiring up third-party logistics and webhooks, or integrating LLM APIs into real product workflows – with a consistent focus on maintainable code that ships on time and holds up in production.

EXPERIENCE

Full-Stack Software Engineer

Nov 2023 – Present

Axis Web Art Pvt. Ltd.

Sardarshahar, Rajasthan

- Architected a Shopify-to-logistics delivery integration (**Node.js/Express**) using Shopify's **Carrier Service API**, webhooks, and fulfillment mutations to automate shipping rates and cut fulfillment effort by **38%**.
- Built an AI-powered bloodwork tool in **Laravel** with a **Server-Sent Events** pipeline, proxying **Google Gemini's** API via a **Cloudflare Worker** to deliver lab-report insights and cut review time by **52%**.
- Engineered high-performance Shopify Dawn theme features in **vanilla JavaScript** – scroll-triggered gallery, infinite scroll with position restoration, and a live cart progress bar via fetch interception – lifting mobile conversion by **16%**.
- Designed a normalized relational schema of **63 tables across 9 domains** for an NDIS SaaS platform, backing billing, compliance, and participant management.

Junior Laravel Developer

May 2023 – Nov 2023

TechZento Solutions

Remote

- Developed dynamic CRUD-driven web applications in **Laravel**, translating client requirements into clean, maintainable features.
- Optimized complex **SQL** queries and Eloquent relationships, reducing key page-load times by **28%**.
- Implemented authentication, role-based authorization, and input validation, hardening applications against common web vulnerabilities.

PROJECTS

Peekr – Random P2P Video & Text Chat | *WebRTC, Socket.io, Express, Node.js*

- Built an Omegle-style app for peer-to-peer **video and text chat** using **WebRTC** and a **Socket.io** signaling server.
- Designed a pooled batch-matching algorithm to pair waiting users efficiently and minimize connection latency.

Shopify Variant Image Automator – Embedded App | *React Router 7, React, TypeScript, Shopify Polaris, Prisma*

- Built an embedded **Shopify app** with **React Router 7**, **Polaris**, and App Bridge that automates product variant-to-image grouping, replacing a manual merchandising workflow.
- Backed app data with **Prisma** session storage and integrated Shopify's **Admin GraphQL API** to read and update product data.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Frontend: React, Next.js, React Router 7, jQuery, Tailwind CSS, Liquid

Backend & APIs: Laravel, Node.js, Express.js, GraphQL, REST APIs, Prisma, Server-Sent Events, Webhooks

Shopify & CMS: Embedded Apps (React Router 7, Polaris, App Bridge), Functions, Admin / Storefront / Carrier Service API, WordPress, WooCommerce

AI & Cloud: Anthropic Claude, Google Gemini, OpenAI APIs, Cloudflare Workers

Databases & Tools: MySQL, PostgreSQL, MariaDB, MongoDB, Git/GitHub, Vite, WebRTC, Socket.io

EDUCATION

Manipal University

Jaipur, Rajasthan

Bachelor of Computer Applications (BCA)

Aug 2023 – Aug 2026

- Relevant coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Cloud Computing, Software Engineering, and OOP (C, C++, Java, Python).
- Maintaining an aggregate of **84%** while pursuing the degree alongside full-time software engineering work.
- Completed a capstone project applying system analysis and software-engineering principles to a full-stack web application.

ACHIEVEMENTS & CERTIFICATIONS

Award: Innovative Programmer Award (2024)

Certifications: Master Full-Stack Web Development with Laravel & PHP; Advanced Laravel
